XGRC®

AI-POWERED SECURITY TESTING PARTNER

Hakware

Continuous, AI-driven penetration testing that keeps you one step ahead.

Hakware is an AI-powered security management platform that tests your environment the way an attacker would — continuously, not once a year. XGRC® partners with Hakware to bring offensive security testing, unified vulnerability visibility, and dark web monitoring into the same governed environment as your ISMS.

WHAT HAKWARE DELIVERS

AI Red Teaming

- Archangel AI Penetration Testing
- Hakware Scout — Network Discovery
- HakObserver — VM-Level Data Collection

Unified Visibility

- OneView Security Dashboard
- Cloud Manager
- Endpoint Manager
- Firewall Manager

Governance & Threat Intel

- Microsoft 365 Auditor
- Zero-Day Manager
- Code Manager
- Dark Web & Leaked Credential Monitoring

THE CHALLENGES IT FIXES

Penetration tests happen once a year

Annual pentests produce a point-in-time report. New vulnerabilities in the eleven months between tests go undetected.

Security data scattered across tools

Firewalls, endpoints, cloud environments, and Microsoft 365 each report separately. No single view of actual exposure.

Manual triage misses what matters

Security teams are buried in alerts. Human error and alert fatigue mean genuine vulnerabilities slip through.

Breaches discovered from the outside

Leaked credentials and exposed data surface on the dark web long before anyone internally notices the exposure.

BUILT FOR THE ENTERPRISE

PART OF THE XGRC® PLATFORM

Hakware runs on one secure, auditable data foundation with risk, compliance and assurance, so it is governed as part of the whole, not in a silo.
