XGRC®

INFORMATION SECURITY GOVERNANCE

MSXCyber®

ISO 27001 compliance without the spreadsheet chaos.

MSXCyber® delivers a complete Information Security Management System aligned to ISO 27001:2022 — with governance, risk management, and audit-ready evidence built in from day one. Data breaches now carry material financial, regulatory and operational consequences — structured ISMS governance is no longer optional.

WHAT MSXCYBER® DELIVERS

Security Operations

- Asset Register
- Monitoring
- Inspections
- Broadcasting

Risk & Controls

- Risk Assessments
- Non-Conformances
- Change Management
- Strategies

Governance & Compliance

- Audits
- Document Control
- Legal Compliance
- Objectives & Targets

People & Communication

- Training
- Stakeholder Management
- Meeting Manager

THE CHALLENGES IT FIXES

ISO 27001 gaps only found at audit

Without continuous monitoring, control weaknesses accumulate quietly between certification reviews.

Asset inventories in spreadsheets

Assets undocumented, risks unassessed. One security incident reveals just how fragile the inventory actually is.

No structured incident response

When a breach occurs, the response is improvised. Regulatory disclosure obligations are missed. Costs escalate.

GDPR and POPIA obligations untracked

Data protection compliance managed through email threads — no evidence trail, no audit readiness.

BUILT FOR THE ENTERPRISE

ISO 27001:2022
Aligned ISMS governance

4
Standards supported

20+
Modules

ISO 27001:2022 | GDPR | POPIA | NIS Directive

PART OF THE XGRC® PLATFORM

MSXCyber® runs on one secure, auditable data foundation with risk, compliance and assurance, so it is governed as part of the whole, not in a silo.
