

A large yellow excavator is shown in the process of digging a trench. The machine's arm is extended, and its bucket is partially visible. The background is a clear blue sky with some light clouds. The overall scene is a construction site.

Case Study

Sandton Plant Hire Transforms SHEQ Management with XGRC®

XGRC
SOFTWARE

INDUSTRY LEADER EMBRACES DIGITAL SHEQ

Sandton Plant Hire is a leading force in South Africa's mining and mining construction sectors. With more than 2,200 employees and decades of operational excellence, the company operates in some of the country's most complex and high-risk environments. Safety, compliance, and operational control are critical to every project they run.

FROM SPREADSHEETS TO INTEGRATION

Until recently, Sandton managed its SHEQ responsibilities using a patchwork of spreadsheets and manual files. This approach was slow, fragmented, and made reporting difficult. Updates had to be entered by hand, reports were error-prone, and insights were locked away in disconnected files.

To modernise their operations, Sandton implemented the SHEQX® platform by XGRC®. This move centralised all safety, health, environment, and quality processes into a single, structured platform—removing duplication, increasing accountability, and creating real-time visibility.

As part of the deployment, XGRC® also developed a custom plugin to integrate Sandton's Microsoft Dynamics 365 Finance & Operations (ERP) system. Master data now flows seamlessly into SHEQX®, keeping people, equipment, and job profiles in sync across systems.

REAL RESULTS, REAL IMPACT

The shift to SHEQX® delivered immediate, tangible value:

Dashboards and centralised reporting offer instant oversight for incidents, audits, training, and inspections.

Automated alerts and task management ensure critical SHEQ actions are completed on time.

ERP integration eliminates manual data entry and reduces admin burden.

Field mobility means teams can log data on the go using tablets, improving accuracy and responsiveness.

“Switching to SHEQX® has been a game-changer. We’ve cut admin, gained visibility, and built a more proactive safety culture.”

Clinton Venter, Group SHEQ Manager, Sandton Plant Hire

FINANCIAL AND **STRATEGIC CONFIDENCE**

“From a finance and operations perspective, we needed a partner that could deliver more than just compliance. XGRC® gave us visibility, integration, and control. It’s already paying off—in both accuracy and peace of mind.”

Petrus Roets, Financial Director, Sandton Plant Hire

A PLATFORM **BUILT FOR GROWTH**

With SHEQX®, Sandton has future-proofed its SHEQ management processes. The team can now respond faster, report more confidently, and scale operations without increasing risk.

Looking ahead, Sandton plans to expand its use of the XGRC® platform by incorporating ENVIRX® for environmental monitoring and ERM for structured enterprise risk management—continuing their journey towards integrated, data-driven governance and compliance.

One-Page Summary: Sandton's SHEQX® Transformation

Challenge	Disconnected spreadsheets and manual SHEQ processes
Solution	Implementation of SHEQX® with Microsoft Dynamics ERP integration
Benefits	Centralised platform, real-time dashboards, proactive task management
ERP Integration	Centralised platform, real-time dashboards, proactive task management
Outcomes	Seamless Dynamics F&O data sync eliminates duplication
Executive Quotes	"Game-changer" – Clinton Venter "Smart investment" – Petrus Roets
Future Scope	Expansion into ENVIRX® and ERM for environment and risk management
